

How to use

1. Open the Hopper Panel by:

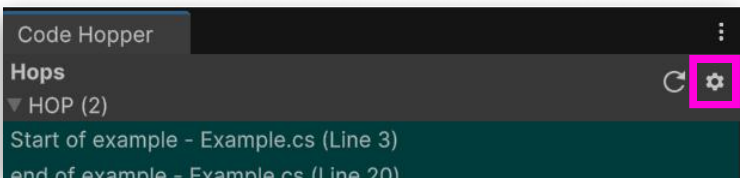

Tools > Veras > Code Hopper > Hopper Panel

2. Dock or let the panel float wherever you want.

3. Open the manager by clicking on **Cog** in the Hopper Panel **OR** navigate to:

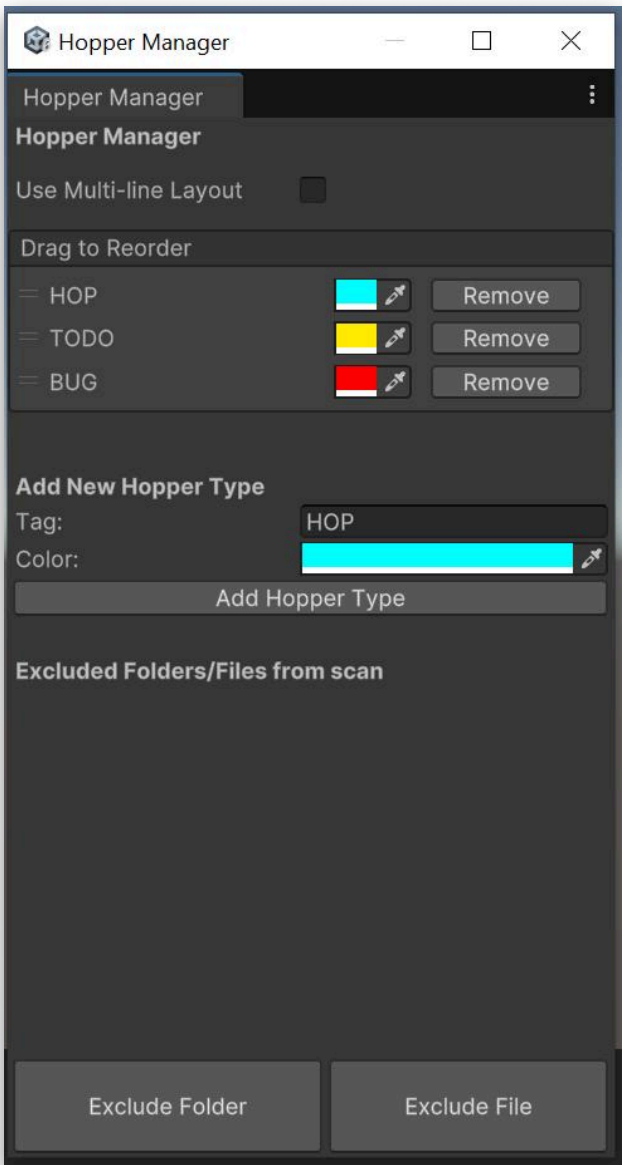

Tools > Veras > Code Hopper > Manager

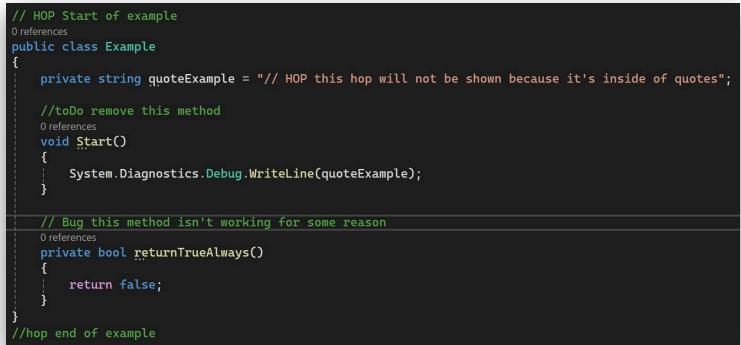

3a.
Change
the style

3c.
Add Tags

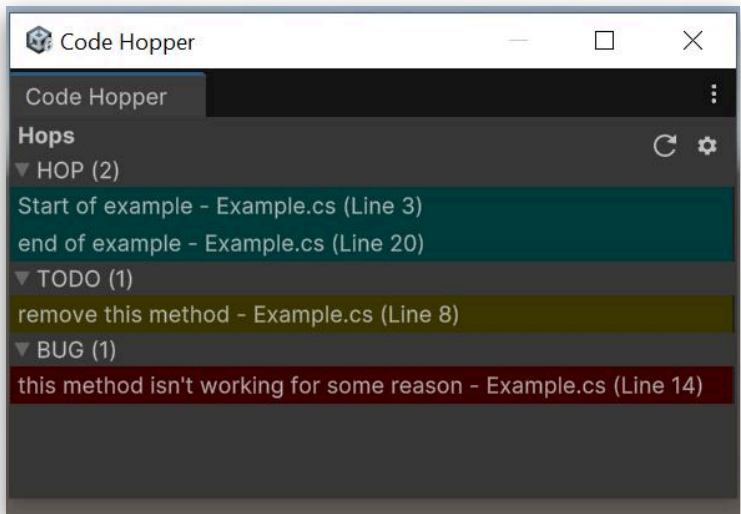

3b.
Rearrange
your tags

3d. Exclude files and folders from scanning to prevent unwanted todo items from appearing

4. Add single line comments in your code with the tags you created as the first word

5. Your list will auto populate with the prefixed comments you wrote allowing you to click on them and opening their location right in the code!

Thanks for trying Code Hopper
